

## Plants Hummingbirds Love

*Native to the Americas, hummingbirds are primarily nectar-feeding birds and especially love plants that have tubular flowers although they will feed from other flowers as well.*

*Here is a list of their favorite flowering plants.*

- |                          |                      |
